ExamIQ

The Content Moat

Building an Unbreakable Competitive Advantage

for 10 Minute School against free platforms

25M+	82K+	15 Yrs	$700M+
K-12 Students	Quiz Items	Exam Data	Market by 2025

THE PROBLEM

Why would a student pay when YouTube is free?

That is the single most important question in Bangladesh EdTech.

THE REALITY

70% dropout rate in self-directed free-platform learning

~5% free-to-paid conversion at 10MS today

300+ EdTech platforms competing on identical free content

0 free platforms with real personalisation or exam-AI

MARKET OPPORTUNITY

A $700M prize with less than 5% claimed.

43M	3.5M	<5%	$700M+
K-12 Students in Bangladesh	**Annual SSC/HSC Candidates**	**EdTech Penetration**	**Projected Market by 2025**
Largest in South Asia after India	*High WTP for exam-prep solutions*	*First-mover defines the premium tier*	*Revenue ceiling for dominant player*

10 MINUTE SCHOOL TODAY

Dominant brand.
Weak product moat.

BRAND & DISTRIBUTION MOAT ✓

- → 15M+ social media followers
- → 35,000+ recorded lessons
- → 82,000+ quiz items
- → 270K paid students
- → $7.5M total funding raised
- → Founder: top-1% national influencer

PRODUCT MOAT × WEAK

- × Content is fully replicable on YouTube
- × No adaptive personalisation engine
- × No exam-pattern intelligence DB
- × No Bengali AI tutor (no global AI has it)
- × No parent outcome dashboard
- × No employer-recognised credentials

Content is the surface.

The algorithm is the moat.

Free platforms can copy every video 10MS makes. They cannot copy a data flywheel built on 2.5 million students' learning patterns, exam outcomes, and knowledge gaps.

INTRODUCING

ExamIQ

Mastery Engine

A premium AI product layer built on 10MS's existing content library — making it intelligent, personalised, and outcome-linked.

Adaptive AI Engine

Personalised learning paths per student

Exam Intelligence

15-yr SSC/HSC question pattern database

Bengali AI Tutor

Curriculum-specific Socratic AI assistant

Verified Credentials

Employer-recognised '10MS Verified' badges

THE CONTENT MOAT

5 Pillars. 5 Reasons They Can't Copy Us.

01

Adaptive Learning Engine

Data Flywheel

Free can't replicate

02

Exam Intelligence System

Proprietary Data

Free can't replicate

03

Bengali AI Tutor

Language Lock-in

Free can't replicate

04

Parent Outcome Dashboard

Switching Cost

Free can't replicate

05

Micro-Credential Network

Network Effect

Free can't replicate

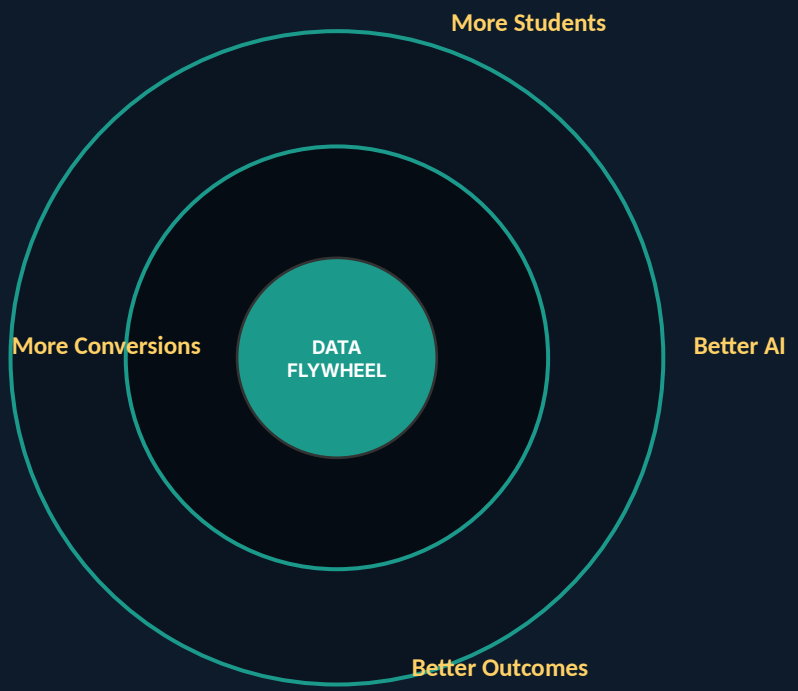

PILLAR 01 — DATA FLYWHEEL

The Adaptive Learning Engine

Uses Bayesian Knowledge Tracing to build a real-time proficiency model across 2,000+ curriculum concepts. Every quiz answer, video pause, and replay updates it.

Why competitors can't copy:

A platform with 1M active learners has exponentially better predictions than one with 10,000. 10MS's existing 2.5M user base is a head start that cannot be purchased.

PILLAR 02 — PROPRIETARY DATA

Exam Intelligence System

15+

Years of SSC/HSC
Past Papers Analysed

NLP

Pattern Detection
Across All Subjects

100%

Exam-calibrated
Practice Sets

HOW IT WORKS

1. NLP scans 15 years of past papers
2. Tags every question by topic, difficulty & year
3. Identifies statistical patterns (e.g. organic chemistry appears every 2–3 years in HSC)
4. Generates practice sets mirroring real exam distribution
5. Accuracy improves after each exam cycle validates predictions

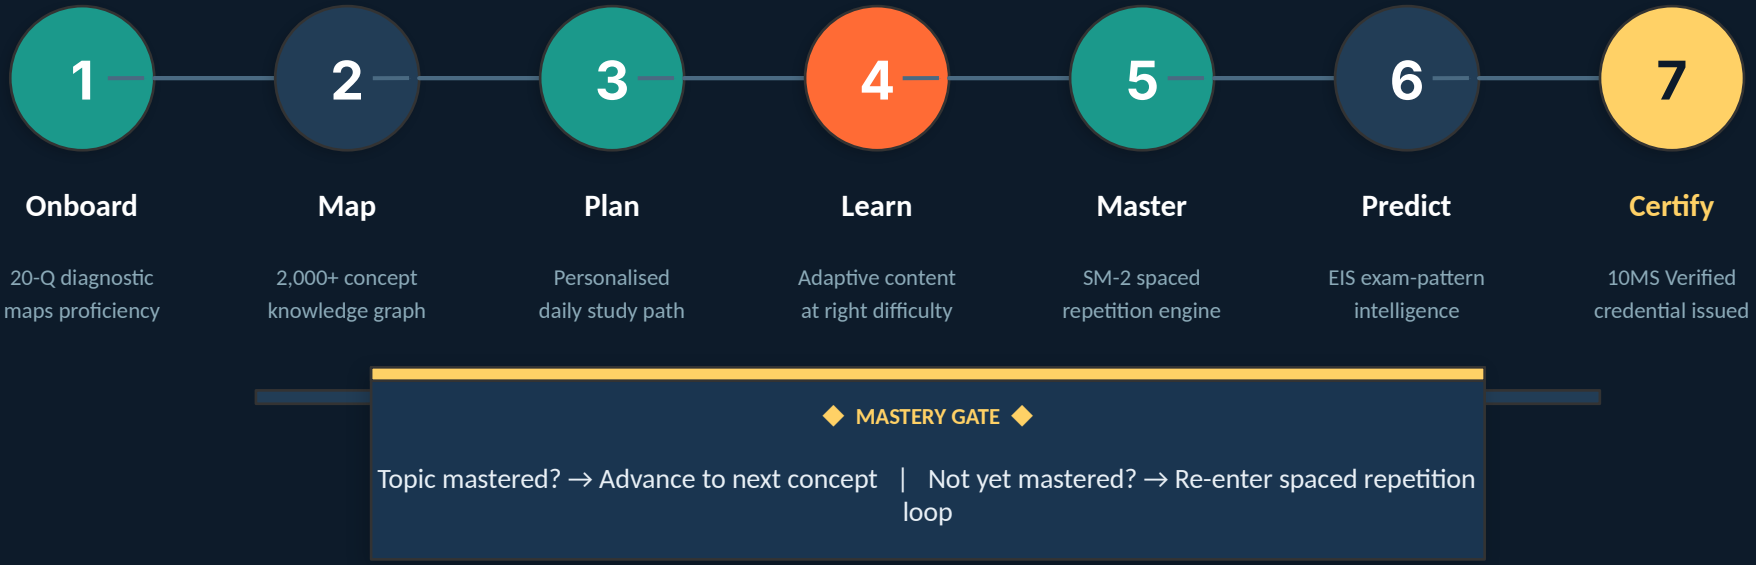

COMPETITIVE DEFENSIBILITY

What Free Platforms Can't Build.

Capability	Free Platforms	ExamIQ (10MS)	Moat Type
Adaptive Path	Static playlists	AI-personalised daily	**Data Flywheel**
Exam Prediction	No database	15-yr NLP analysis	**Proprietary Data**
Bengali AI Tutor	English-first only	BD curriculum fine-tuned	**Language Lock-in**
Parent Dashboard	Zero tracking	Weekly Bengali reports	**Switching Cost**
Credentials	No verification	50+ employer partners	**Network Effect**
Progress Memory	Stateless sessions	12-month longitudinal	**Data Lock-in**

THE STUDENT EXPERIENCE

How ExamIQ Works.

Every step builds proprietary data. Every data point deepens the moat. Free platforms are locked out by design.

REVENUE MODEL

One Free Tier.
Two Premium Pathways.

Free

BDT 0

Forever free

- ✓ Limited video library
- ✓ 10 quizzes / day
- ✓ 3 AI Tutor Qs / day
- ✓ Basic progress view
- ✓ No adaptive path

Pro Monthly

BDT 299–499

Per month

- ✓ Full video library + all quizzes
- ✓ Unlimited AI Tutor sessions
- ✓ Parent dashboard (weekly)
- ✓ Adaptive Mastery Path
- ✓ Exam Intelligence reports
- ✓ Study rooms + peer cohorts

Pro Annual

BDT 2,499–3,999

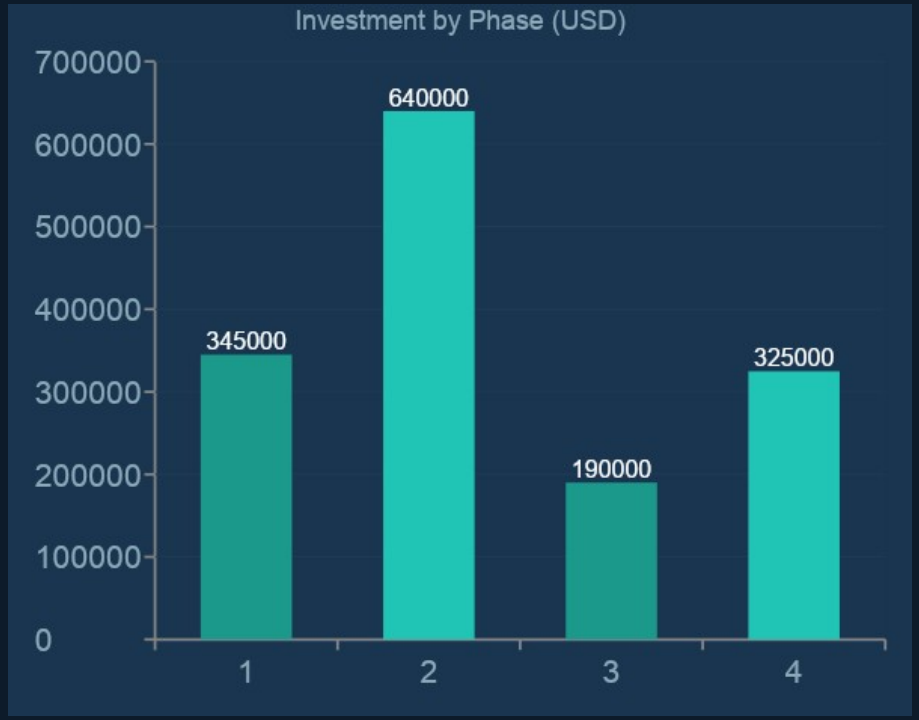

Per year (save 30%)

- ✓ Everything in Pro Monthly
- ✓ Unlimited micro-credentials
- ✓ AI-proctored assessments
- ✓ 10MS Verified certificates
- ✓ Priority support
- ✓ SmartBooks access

75–80% cheaper than coaching centres • Free tier drives conversion, not revenue

FINANCIAL PROJECTIONS — 18 MONTHS

2x–2.8x Revenue Growth.

Total Investment

$1.24M–$1.76M

IMPLEMENTATION ROADMAP

18 Months to an Unbreakable Moat.

Phase 1 Foundation
Mo 1–4 • $345K

- → Hire Chief Data Officer
- → Unified data pipeline
- → EIS database schema
- → Knowledge graph v1

Phase 2 AI Development
Mo 4–8 • $640K

- → ALE v1 pilot: 5K students
- → Bengali AI tutor beta
- → Parent dashboard v1
- → A/B test infrastructure

Phase 3 Market Launch
Mo 8–12 • $190K

- → ExamIQ Pro tier live
- → 20+ employer MOUs
- → Regional expansion
- → '10MS Verified' launch

Phase 4 Scale & Deepen
Mo 12–18 • $325K

- → ALE v2 score prediction
- → SmartBooks (5 subjects)
- → Content creator marketplace
- → Series A data room

The question isn't whether to build ExamIQ.

It's whether 10MS builds it before someone else does.

NEXT STEPS

1. **Approve Phase 1 budget: $290K–$400K**
2. Hire Chief Data Officer within 30 days
3. Sign BUET NLP research partnership
4. Initiate first 5 employer MOU conversations
