The Insurance Discovery Problem No One’s Solving for First-Time Buyers

Created by
Farha Jabin Oyshee

Background: Key Points:

- Young users **(ages 25–30)** are *digitally fluent but often feel emotionally overwhelmed* when purchasing life insurance.
- Platforms like Policybazaar and Digit offer too many options, little education, and pushy follow-ups.
- Despite digital convenience, **56% still rely on friends/family to make decisions** due to trust gaps.

Solution: Guided, Humanized Insurance Onboarding

What We Built:

- **Jargon-free onboarding** using quizzes to gather goals and needs.
- **Smart Plan Suggestions** with side-by-side comparisons and human context.
- **Trust-Driven Details View** with social proof, FAQ clarity, and access to advisors if needed.
- **Human Reassurance Layer** to offer support *without disrupting* self-serve UX.

User Persona: Meet Our Target User; Age 28

Key Attributes:

- Salaried professional living in Tier 1 city
- Aware of the need for insurance but confused by terminology
- Postpones decisions due to fear of making a wrong choice
- Prefers digital-first tools but values family advice

Pain Points:

- “I don’t get all these acronyms.”
- “Why can’t someone just tell me what’s right?”
- “Do I need to trust an agent?”

Next ->

User Flow: From Confusion to Confidence in Under 10 Minutes

What We Built:

- **Welcome Screen** → Engaging hero image + “Get Started”
- **Quiz - Life Stage** → Cards for "Single", "Married", "Parent"
- **Quiz - Income & Dependents** → Input + selector
- **Coverage Preferences** → Toggle duration + critical illness
- **Smart Plan Suggestions** → 3 best-match plans with comparison
- **Plan Detail + Trust** → FAQs, badges, reviews, advisor button
- **Human Reassurance** → Chat, callback, video
- **Final CTA** → Recap with Buy / Save / Share options

About you

Step 1/10

What's your current life stage?

Single
Just me
No spouse or dependents

Married
Married
Married, no dependents

Kids
Married with kids
Married with one or more children

Other
Other
None of the above

Next

About you

Step 1 of 5

What is your annual income?

$0

How many dependents do you have?

0 1 2 3 4 5

6 7 8 9 10

Next

Coverage Preferences

Coverage Duration (Years) 20

Critical Illness Coverage
Add coverage for critical illnesses like cancer, heart attack, and stroke.

See My Plans

Solutions

01 Life Stage Selection

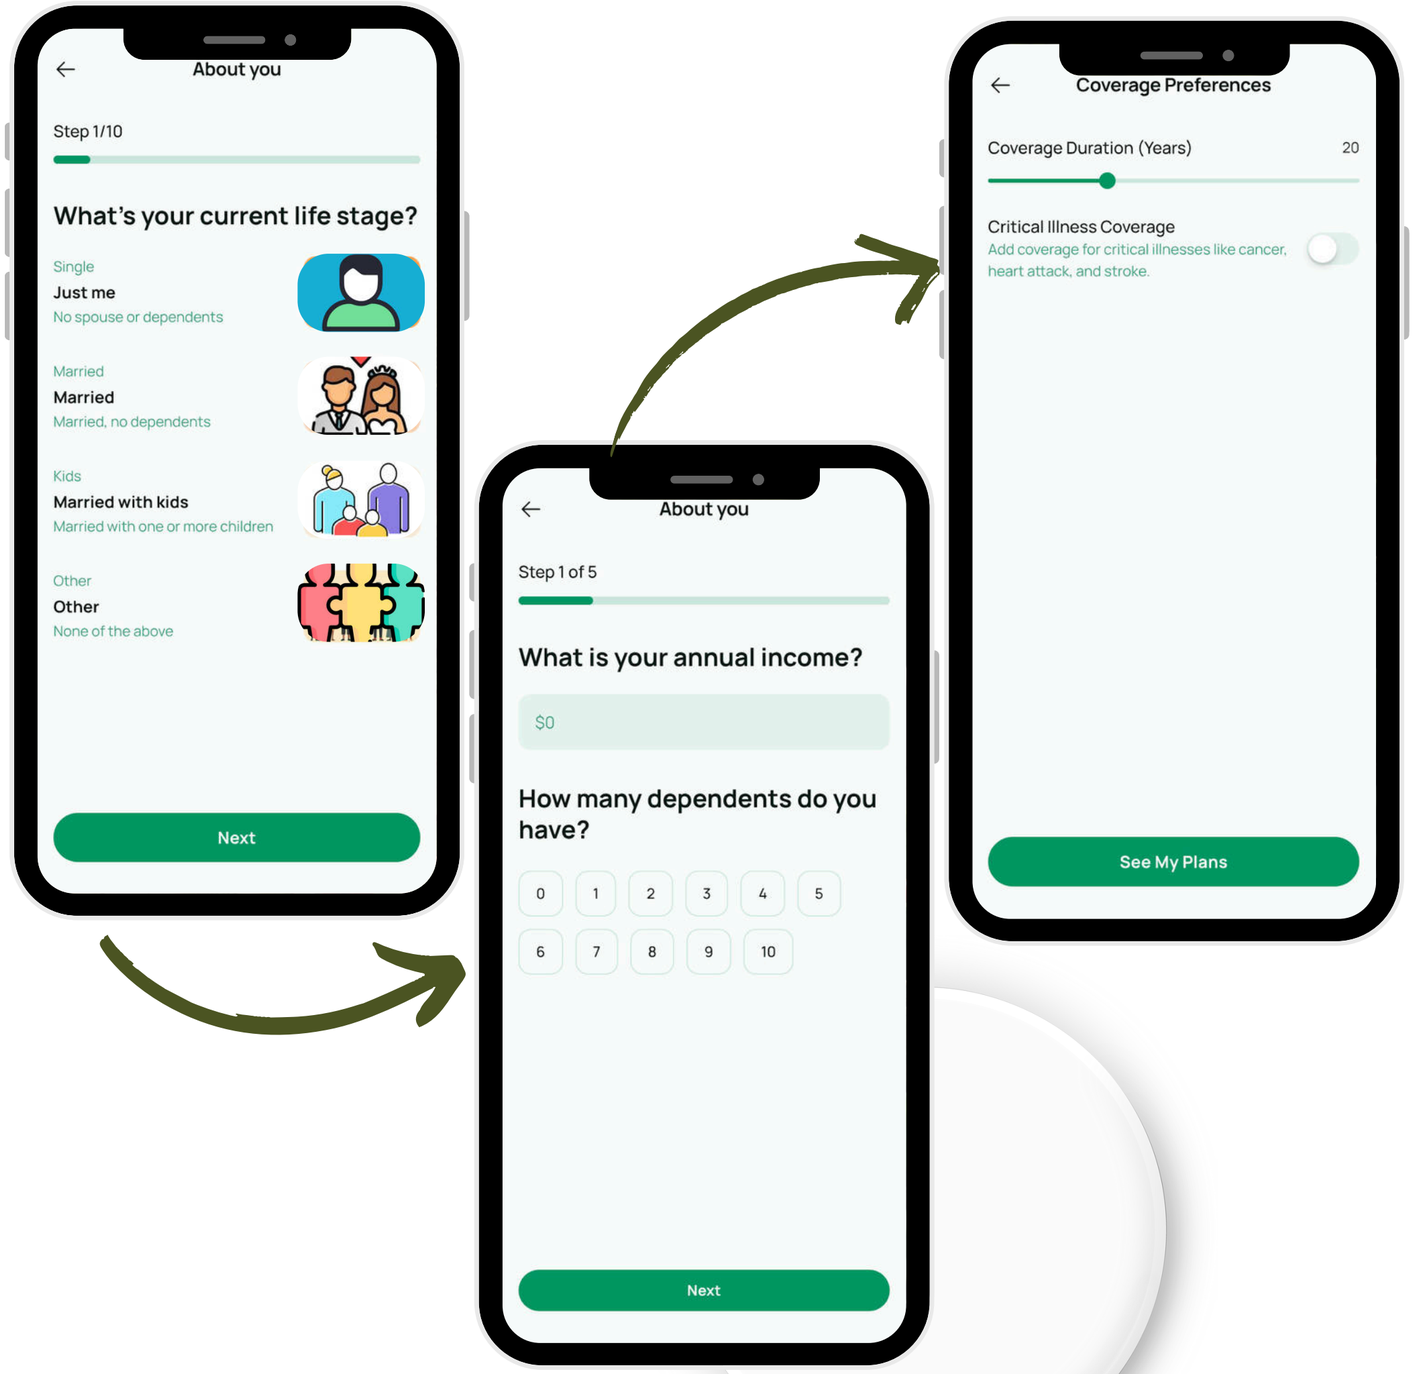

- Card options + "Next"

02 Income & Dependents

- Income input + dependents dropdown + "Next"

03 Coverage Preferences

- Duration slider + critical illness toggle + "See My Plans"

Solutions

04 Smart Plan Suggestions

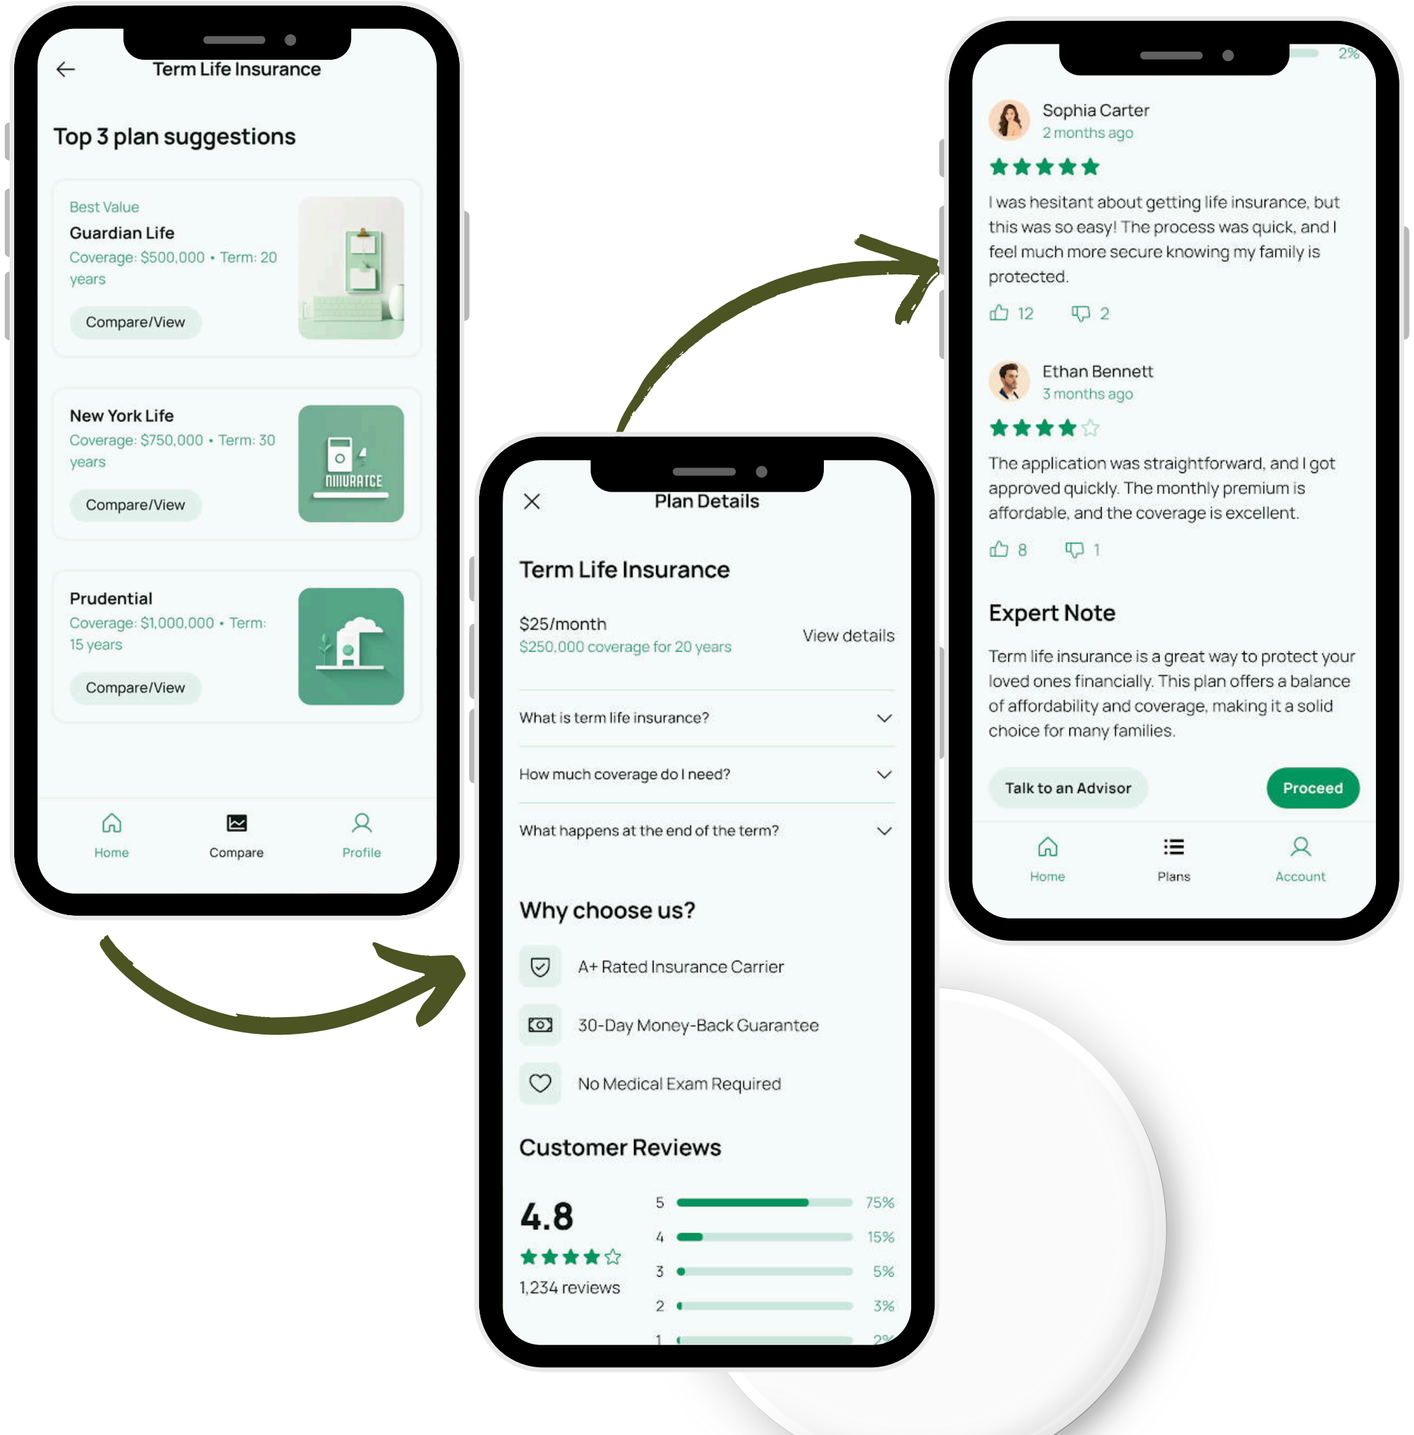

- Top 3 plans with key details + "Compare/View" buttons

05 Plan Details & Trust

- Benefits breakdown + FAQs + trust badges/reviews + "Proceed"

06 Human Support Layer

- Live chat/callback/video + social proof + "Ask us anything"

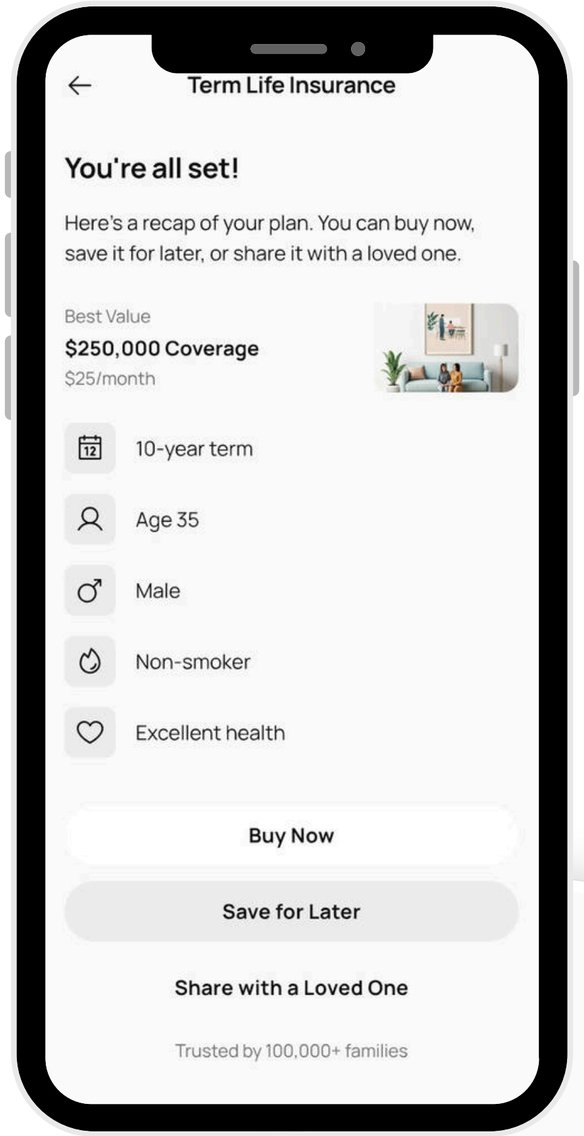

Solutions

07

Final Commitment CTA

- Plan recap + Buy/Save/Share options + trust badge

Metrics: Key Points: Early Indicators of Product-Market Fit

Based on competitor UX gaps and problem framing:

- 2× increase in plan discovery completion (vs. existing flows)
- 30% drop in user drop-off after onboarding
- 20% higher perceived trust (via survey)
- Reduced support load thanks to a proactive explainer video

Competitive Advantage

Gaps in Existing Platforms:

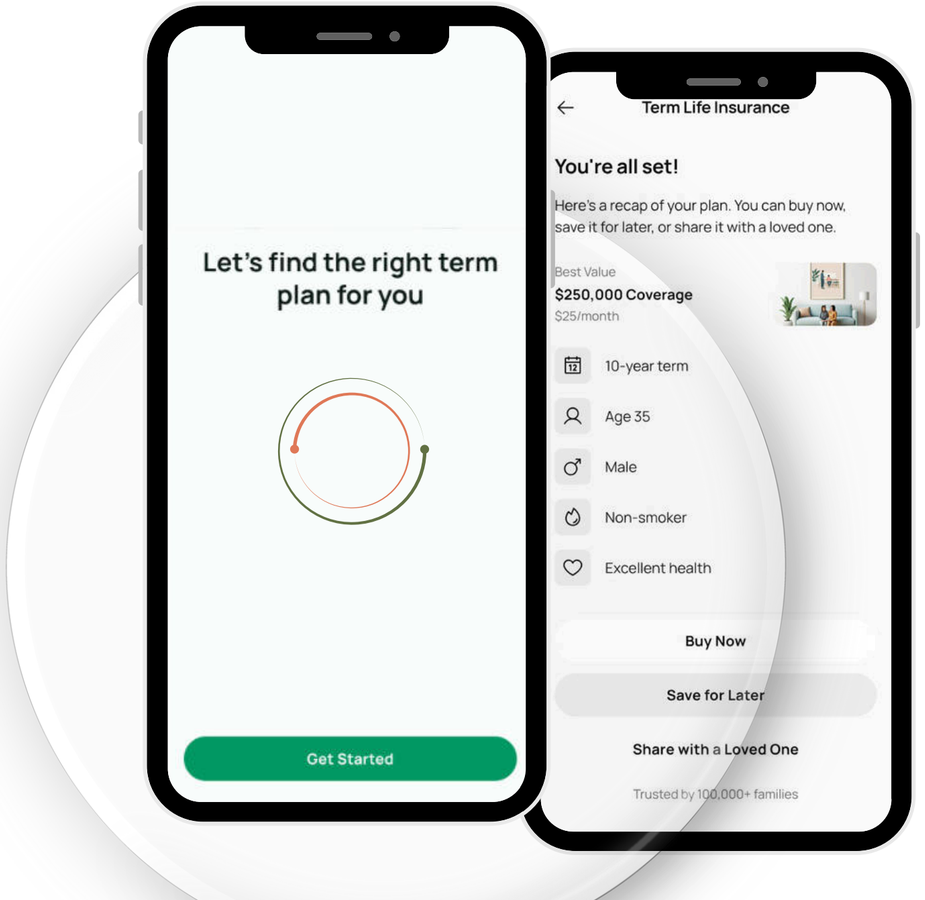

- **Policybazaar** → No decision support, just aggregation
- **Digit** → Limited guidance, technical UI
- **Coverfox** → Overwhelming comparison view

We Worked On:

- Simplicity
- Clarity
- Human reassurance
- Faster decisions with more trust

Go-To-Market Strategy

Launching with Focused Distribution + Validation

01

Channels:

- **B2C:** Partner with fintech newsletters, insurance micro-influencers
- **B2B2C:** Embed with HR portals & tax filing apps (ClearTax, INDmoney)
- **Community:** Leverage Reddit, ProductHunt, and real buyer testimonials

02

Phase 1 Goals:

- 500 test users via closed beta
- Run qualitative interviews + onboarding analytics
- Iterate on trust-building flow and live support features

The Ask / Call to Action

Gaps in Existing Platforms:

We're looking for:

- Mentors in InsurTech/UX
- Beta users aged 25–30
- Introductions to insurance platform partnerships
- Product design feedback
